Abstract

Scientists around the world are attempting to provide a complete theory of the fundamental forces, which should include quantum gravity. As yet, no one has completed the assignment. What is lacking is the basic understanding that our universe literally blinks, off and on, more than 1 trillion times each second. Just before blinking off each cycle, the gravitational force reduces to zero, making an easy explanation for quantum gravity.

This short technical paper presents an alternate mathematical approach for determining the blinking frequency of our universe. The source for this alternate idea comes from an email sent to this author in May 2015. The source author prefers to remain anonymous.

Basically, Let's think about the fundamental unit of the universe as a classical entity. The energy of such a classical entity, using the equipartition theorem, translates the number of degrees of freedom into "units" of $k_B T$ (where T is the temperature and k_B is the well-known Boltzmann constant). In this way, we find that the fundamental energy is $3k_B T$ (6 d.o.f.).

We use a foundational temperature, consistent with the anthropic principle, of the freezing point (and melting point) of the essential object for existence--water. Using this temperature, we obtain a fundamental energy of ~ 70.6 meV. Calculation is as follows: $70.6 \text{ meV} / (\hbar \pi^4) = 1.1 \text{ THz}$. Note that the π^4 in general is π^D , where D is the number of spacetime dimensions in existence. Each reader must comprehend that our universe is literally blinking off and on, at 1.1 trillion times every second (THz).

For those unconvinced that our universe is blinking, please read "The First Periodic Table for Elementary Particles," or "1024 Elementary Particles" which provides compelling mathematical evidence.

Also see youtube:

Colonel Philip Corso, THE DAY AFTER ROSWELL; author comments on the Army's investigation of the 1947 Roswell vehicle; "We were never able to figure out how the propulsion system works... We only know it has something to do with blinking." [1]

Introduction

As explained in previous papers, in our terms, the universe blinks off and on at a very high frequency.[2] Due to this blinking, there is no passage of time. We will call this the Lighthouse Frequency, or the natural resonant frequency of our universe. We will find that the gravitational force constantly varies between zero and a maximum value, while also retaining its time-averaged value of 9.81 m/sec^2

Background

Everything in a physical universe has a natural, resonant frequency – including the universe itself. That frequency is approximately 1 THz and can be utilized as a carrier wave.

This can be called a vibration, a blinking, or a frequency, but perhaps a better explanation, in our terms - the entire physical universe is newly constructed and then collapses to a single point at approximately 1 trillion times each second, IN OUR TERMS (this must be emphasized). At the moment of collapse, there is no distance between galaxies - instant communication and instant travel are possible. (In larger terms, all of time is simultaneous, and there is no blinking.)

This resonant frequency is named the "Lighthouse Frequency."

Figure 1. The four fundamental forces are related by phase angle, such that when gravity and the electromagnetic force are near zero (sin 180), then the strong force and weak force are at their largest value. The four fundamental forces are constantly varying.

Technical

The author of this alternate mathematical approach is at a major university in California and prefers to remain anonymous. I initially provided my technical paper to him, and this was his answer/comments in return. He provided this alternate solution via email in May 2015. A summary of his email follows:

Let's think about the fundamental unit of the universe as a classical entity. The energy of such a classical entity, using the equipartition theorem, translates the number of degrees of freedom into "units" of $k_B \cdot T$ (where T is the temperature and k_B is the well-known Boltzmann constant). In this way, we find that the fundamental energy is $3 \cdot k_B \cdot T$ (6 d.o.f.).

We use a foundational temperature, consistent with the anthropic principle [2], of the freezing point (and melting point) of the essential object for existence--water. Using this temperature, we obtain a fundamental energy of ~ 70.6 meV,

[1] Calculation is as follows:

$$3 * 8.62E-05 \text{ eV/K} * 273.15 \text{ K} = 70.614 \text{ meV}$$

and then convert this into a frequency
 $70.614 \text{ meV} / (\hbar * \pi^4) = 1.1 \text{ THz}$

Note that the π^4 in general is π^D , where D is the number of spacetime dimensions in existence.

Lighthouse Frequency calculated to be approx. 1,101,361,642,963.57 Hz

[2] The anthropic principle states that observations of our physical universe should be compatible with the life (us) that observes it.

Figure 2. Sine wave of our Blinking Universe.

Conclusions

This technical note has described an alternate mathematical approach for determining the blinking frequency of our universe. Comments and suggestions are welcome to the email address below.

5. Seth (Jane Roberts), Early Sessions, Session 125, 1965: “Within the electrical system, intensity is also responsible for the potentiality, duration and electrical mass, which is a mass of a different sort; a mass that takes up no space, and is not made of matter as you know it, but mass whose thickness is one of varying electrical intensities which form a definite shape, a separate field more or less, an electrical coded counterpart for physical matter.”
6. Seth (Jane Roberts), Early Sessions, Session 135, 1965: “All depth, all dimension and all distance is therein contained within the electrical universe. There is here, as I have said, no such thing as size in your terms, or shape in your terms; but there is, again, distance, which is not absolute but varying, and which can be said to exist both backward and forward indefinitely within the infinite intensities. And all reality within any given field basically occurs within such intensities.”
7. Seth (Jane Roberts), Early Sessions, Session 137, 1965: “As yet your scientists and physicists have a very limited concept of action. Their laws concerning action and force will only apply within the physical field. Action is basically electrical, but within your field only the most obvious forms of electrical action have been perceived... All realities with which you will be concerned, and with which mankind is intimately concerned, are built up electrically.”
8. Richard Lighthouse, Preliminary Model for Grand Unified Theory (GUT), smashwords.com, 2014.
9. Seth (Jane Roberts), Early Sessions, Session 582, 1971: “What you perceive of time is a portion of other events intruding into your own system, often interpreted as movement in space, or as something that separates events—if not in space, then in a way impossible to define without using the concept of time. What separates events is not time, but your perception.”
10. Seth (Jane Roberts), Early Sessions, Session 671, 1973: “Space itself accelerates in ways that you do not understand. You are not tuned into those frequencies. Any point in space is also a point in what you think of as time, a doorway that you have not learned to open.”

Seth Quotes (Jane Roberts)																		
"...dream reality is as valid and real as waking reality." — The Seth Material, Chapter 14																		
"Entropy does not exist. It is the appearance only of an effect within the physical perspectives; that seemingly unusable energy helps form your dream universe. That energy from which you seem to get no work physically, that energy which seems to diminish in value, is plowed backward into inwardness, regenerated and used to form universes without which you could not exist, even as physical beings." — Early Sessions, Session 109, November 23, 1964																		
"They are, if you prefer, incipient particles that have not yet emerged into matter." — Seth Speaks, Chapter 5, Session 524, April 20, 1970																		
"The connections between the dreaming self and the waking self, and between the dream universe and the physical universe, exist on chemical, electromagnetic and psychic levels. They are completely interwoven. Effects in one are reflected in the other(s)." — Early Sessions, Session 178, August 16, 1965																		

Figure 4. A blinking universe gives rise to 1024 Elementary Particles. 64 particle masses X 4 charges X 4 spins.

Funding:

This research was generously supported with a grant from the Foundation Opposed to Academic Puffery (FOAP).

My entire collection of ebooks were deleted from Smashwords.com in January 2020, because kevin@smashwords.com claims he did not like my “intentions.” He fully admits that I did not violate their Terms of Service, an issue of which they initially accused me. From 2013 thru 2019, I distributed more than 21,000 ebooks from a smashwords account. Most of them were free.

I am a proud government whistleblower – see my ebooks about the criminal acts of the CIA and FBI. Readers are advised that the CIA may be blocking or restricting access to some of my ebooks, especially outside the United States. Readers are further advised that digital tracking tags may have been placed in my ebooks. The content of some ebooks may have been altered – still trying to monitor this. If you have tried to contact me, it is possible that emails and phone calls are being blocked.

Readers are advised to review the website DrJudyWood.com which provides compelling evidence about 9-11.

<http://drJudyWood.com/articles/DEW/StarWarsBeam4.html>

Note Figure 63. Dr Wood spent many years researching this and filed suit against the US Government, along with Dr Morgan Reynolds. Jet fuel does not burn through concrete and steel. The cookie-cutter holes were made by a high-powered laser that rapidly ages material - and turned the concrete and steel into dust in seconds. Note Figure 38(a) here:

<http://drJudyWood.com/articles/DEW/StarWarsBeam3.html>

This laser operates at a harmonic of the blinking frequency - which causes rapid aging. Readers are also advised to see the movie "Unacknowledged" by Dr Steven Greer, M.D., and to watch the youtube videos by the Honorable Paul Hellyer, former Canadian Minister of Defense. He has a book titled, “The Money Mafia.”

For more than 10 years, this author has been stalked, harassed, and threatened by US Government agents from the CIA, FBI, and NSA - because of the content of my ebooks. My home has been broken into, repeatedly. In May 2014, my girlfriend was drugged and kidnapped from LaGuardia airport. This is not a joke. My computer, phone, and alarm system have been hacked, including those of my friends and family. It is truly sad and pathetic, these government agencies have become criminal organizations, under the Deep State. If something happens to me (disappearance, false criminal charges, sudden accident, etc. - my readers can be certain that the FBI and CIA were involved. I am not depressed, I do not own a gun, and I have never been suicidal – this needs to be stated because the CIA continues to arrange murders, and stage it as a suicide. See my related ebooks identifying the murders of Gary Webb, Michael Hastings, Phil Schneider, William Colby, Dr Eugene Mallove, Stan

Meyers, Phil Haney, and others. In my opinion, the CIA and Council on Foreign Relations (CFR) are behind these criminal acts; David Rockefeller was the CEO and Chairman for many years.
